

Harvesting Data providers / Repositories

Following we list data providers / repositories harvested during GeRDI releases. It is worth noting that the harvesting process progressed incrementally, as data providers / repositories were “on boarded” and ready for the process.

GeRDI release	Release name	Data provider(s) / repository(ies)
0.1	GeRDI Ada	<ul style="list-style-type: none"> • FAOStat • ArcGIS • PANGAEA
0.2	Bernhard	<ul style="list-style-type: none"> • SeaAroundUs • AlpEnDAC • SOEP • ENA • OceanTEA • DWD • SSP • IMR
0.3	Chen	/
0.4	Emil	<ul style="list-style-type: none"> • OPENDATA LMU • IMR • EUROSTAT • FishStatJ • OGLP • DWD • ISIMIP • IFO • ZENODO
0.5	Françoise	<ul style="list-style-type: none"> • ClinicalTrials
Total Data providers / Repositories harvested		21

Table 1 Data providers harvested per release

On another notes, the systems architecture adopted in GeRDI enabled us to proceed with harvesting activities regardless of the development of the rest of the services. The approach of self-contained systems (SCS) enabled us to accommodate community requests for data providers /repositories harvesting even during the final releases in the project, as shown in the table above. This architectural “decoupling” provided us with the commodity to address more requests – longer in the development process, this eliminating the need to have a final set of repositories to harvest as early as the first release.
